

Soluble Fulvic Acid

Soluble Fulvic Acid is a concentrate from high grade fulvic acid. This high efficiency multi-functional organic fertilizer is ideal in the aid of plant uptake of micro nutrients.

Additionally, it is compatible with most liquid fertilizers, pesticides, herbicides and defoliant. However if the desired combination has not been previously used, a compatibility test is highly recommended.

KEEP OUT OF REACH OF CHILDREN

Guaranteed Analysis

Fulvic Acid	69%
Nitrogen	0.40%

Derived from peat, arbor and herbs
